

FIND WHERE YOUR GROWTH IS GETTING STUCK

You already have attention, users, leads, or customers - but one part of the path to your business goal is underperforming. I investigate one critical customer journey, find where it's most likely breaking, and define what to test first.

START FREE FIT CALL See if there's a real bottleneck worth investigating.	STEP 1 GROWTH BOTTLENECK SPRINT Diagnose the bottleneck and define the first test.	STEP 2 RUN FIRST TEST Optional implementation.	OUTCOME NEXT DECISION Use the result to decide what happens next.

STEP 1 · THE PRODUCT

GROWTH BOTTLENECK SPRINT — \$2,500 · 2 WEEKS

FIND WHAT'S BREAKING - AND WHAT TO TEST FIRST.

ONE BUSINESS GOAL · ONE CUSTOMER JOURNEY · RELEVANT DATA + ACCESS

I investigate the journey we chose, identify the bottleneck most likely holding growth back, and define the first experiment worth running.

WHAT YOU GET — EVERYTHING YOU NEED TO MAKE THE NEXT DECISION.

1. BOTTLENECK DIAGNOSIS Where the journey is most likely breaking, why, and what evidence supports it.	2. PRIORITIZED ACTION PLAN What should change first, why it matters, who owns it, and what we expect to learn.
3. FIRST TEST BRIEF One defined experiment to test the most important bottleneck: what changes, what stays constant, what needs to be created, who owns it, what we measure, and what decision the result will help you make.	4. FINAL WALKTHROUGH What we know, what we still need to learn, what I'd do first, and what happens next.
SCOPE Investigation · analysis · recommendations · test design · final walkthrough. IMPLEMENTATION · Scoped separately after the Sprint.	

AFTER THE SPRINT

STEP 2 · RUN THE FIRST TEST If you want me to help run the test, I'll scope and price that separately. No ongoing engagement required.	OUTCOME · NEXT DECISION Use the test result to decide what happens next: continue, iterate, change direction, or stop.
